

CABRAMATTA LOOP PROJECT

July 2022

CLP 014

The Cabramatta Loop Project will increase rail freight capacity on the Southern Sydney Freight Line by constructing a new 1.65km section of track, allowing freight trains travelling in either direction to pass each other. Fulton Hogan is designing and constructing the Cabramatta Loop Project for ARTC.

OUT OF HOURS WORK IN YOUR AREA

We are planning to **work outside normal construction hours** at the Sussex Street underpass in preparation for construction of the new rail bridge, as part of the Cabramatta Loop Project. This work will include piling activities using heavy machinery such as a piling rig, cranes, elevated work platforms as well as excavators, trucks, welding equipment and handheld tools.

HOW MIGHT THIS WORK AFFECT YOU?

We will be working extended hours on **Saturday 9 July and Saturday 16 July from 8am to 6pm**, weather permitting, in order to carry out this work safely and reduce the duration of any disruption to the community.

This work may be noisy and possibly disruptive however every effort will be made to keep noisy works to a minimum and reduce impacts to the community wherever possible. Some of the measures we will implement include noise monitoring and using noise mitigation devices on equipment.

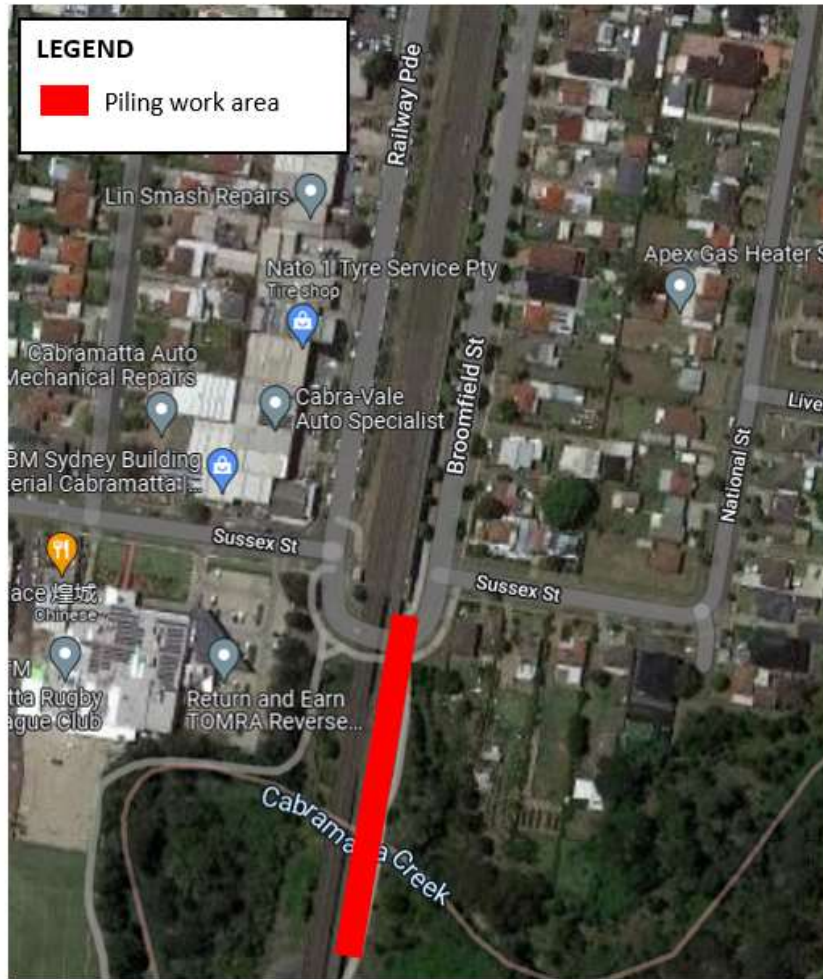

You can find out more information about noise and vibration, bridge works and the type of machinery we will use in the fact sheets on our website cabramattaloop.com.au. (go to the 'Library' page and use the search function).

A diagram showing the location of the work can be found on the map on the next page.
