

THE LOOP

News from the Cabramatta Loop Project September 2022

Construction is well underway on Broomfield Street, Cabramatta

WELCOME TO THE LATEST EDITION OF THE LOOP

This issue of The Loop includes information about upcoming work and information about what our team has been up to. We also look ahead to major construction continuing on Broomfield Street, Sussex Street and inside the rail corridor. If there's something you want to hear about, please let us know!

WHAT'S COMING UP?

BROOMFIELD STREET

Significant progress has been made on Broomfield Street over the last few months. The most noticeable being the installation of kerb, gutter, parking bays, footpaths and even some driveways, which have transformed the street. The remaining driveways and final landscaping will be completed in the new year.

We are now starting work on the western side of Broomfield Street, which will include stormwater drainage installation, construction of the retaining wall and finally, the relocation of the noise wall.

Broomfield Street view from Cabramatta Station, Cabramatta

As a result, there will be changes to traffic in this area so we can keep you and our crews safe.

In the coming months, we will be bringing in large equipment to move heavy planks and other bulky materials into the rail corridor for the construction of the new Sussex Street and Cabramatta Creek rail bridges.

WHAT WE'VE BEEN DOING

There has been a great deal of construction near the Cabramatta Creek as we make steady progress with piling and formwork (to prepare for pouring concrete) as part of the construction work for the new Cabramatta Creek and Sussex Street rail bridges. Despite heavy rainfall and flooding at the beginning of July, the team quickly rebuilt the piling pads, cleaned up the debris and returned to work within a few days. Fortunately, there was no permanent damage to the site or equipment.

Piling and form work activities at the Sussex Street bridge

OUR RECENT RAIL SHUTDOWN

Our recent rail shutdown weekend took place on the weekend of 2 to 4 September.

We carried out construction activities including signalling work, bridge piling, concrete pouring and using cranes for lifting plant and material into the rail corridor at various locations on the rail network in the area.

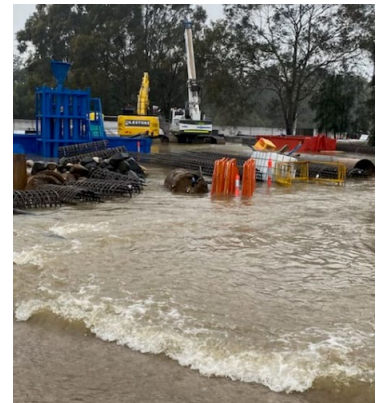

Work at Cabramatta Station

During this time, there will be disruptions to the shared path access at Cabramatta Creek.

Please take care when in these areas and pay attention to project signage and traffic control. For more information, visit the Community Updates page on our [website](#).

FLOOD IMPACTS

The site compound in Jacquie Osmond Reserve was seriously impacted by the heavy rain on 3 July 2022. Our crews worked quickly to clear up the site when the flooding receded.

Flooding at the site compound

GETTING OUT AND ABOUT

The team hosted an information stall at the Cabramatta Moon Festival on Sunday 28 August. It was a great way to meet the local community and tell them about the project, while enjoying the atmosphere in the vibrant centre of Cabramatta.

We held a similar session at the Cabramatta Rugby League Club in June. It was a successful evening and great way to engage with local residents.

Our team at the Cabramatta Moon Festival stall

CONSTRUCTION TIMELINE

The following table provides a broad outline of the status of construction activities and what scope is still to be completed. Some bridge piling activities and work inside the rail corridor will take place outside standard construction hours, from 1pm to 6pm on Saturdays and up to eight nights per month.

The timing or type of work may change due to weather or other unforeseen circumstances. Further information about these works will be provided in the project's community notifications at least five days before the works take place.

For more information about our hours of work and how we manage noise, visit our website by scanning the QR code below.

WHAT YOU NEED TO KNOW

PEDESTRIAN ACCESS WARWICK FARM TRAIN STATION

We will be temporarily closing the eastern pedestrian staircase to Warwick Farm Station from the Hume Highway footpath for up to four weeks in early to mid-September, weather permitting. This is to allow the team to work safely on the construction of a signalling structure. Pedestrian access to the eastern train platforms from the Hume Highway footpath will be available via the western staircase (Remembrance Avenue side). Signs will direct commuters to the detour pedestrian route during this work.

SHARED PATH – CABRAMATTA CREEK

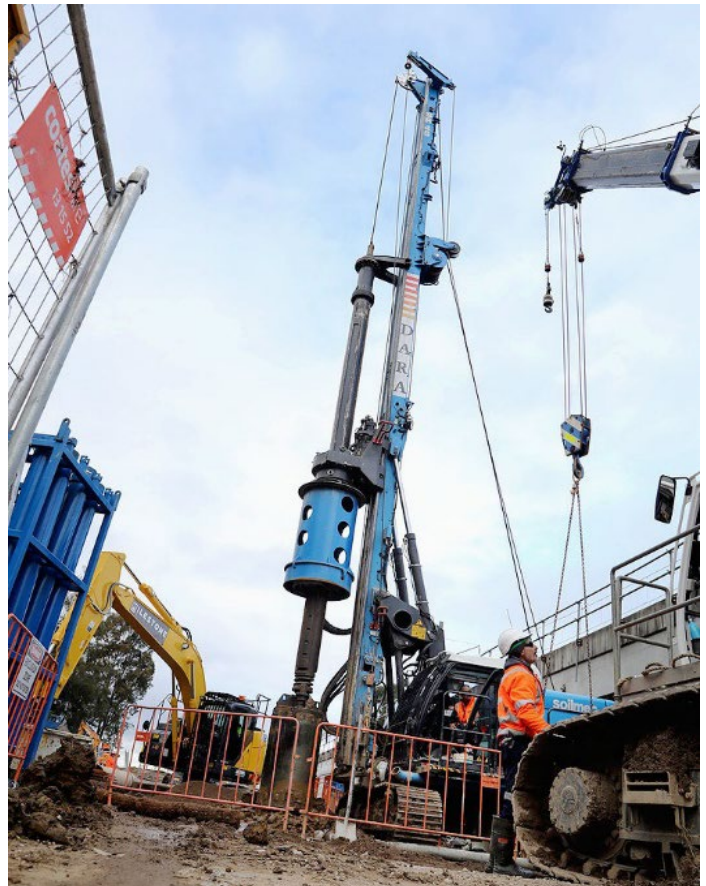

There will be temporary disruptions on the shared path at Cabramatta Creek periodically between September and November 2022, to allow safe set up of heavy machinery for work on the new Cabramatta Creek bridge.

We may also need to temporarily close the footpath for 48 hours in November. Signs with details of work location and timing will be placed around the project area before this work begins.

Due to the frequent wet weather we are experiencing, the project area is subject to flooding and the timing of these works may change. Please contact the project team if you have any questions or concerns. We appreciate your continued patience and understanding while we carry out this important work.
