

CABRAMATTA LOOP PROJECT

September 2022

CLP_019

The Cabramatta Loop Project will increase rail freight capacity on the Southern Sydney Freight Line by constructing a new 1.65km section of track, allowing freight trains travelling in either direction to pass each other. Fulton Hogan is designing and constructing the Cabramatta Loop Project for ARTC.

WHAT ARE WE DOING?

Work on Broomfield Street continues to progress, with construction activities taking place at several locations in and around the rail corridor in Cabramatta and Warwick Farm. This notification provides you with information about upcoming work and changes to vehicle, cycle and pedestrian access.

BROOMFIELD STREET

At the end of September 2022, the team will start piling and construction of the retaining wall on the western side of Broomfield Street in preparation of the relocation of the noise wall. In order to construct the retaining wall, the team will be setting up heavy machinery along the western side of Broomfield Street from Sussex Street to Bridge Street. There will be no cyclist, pedestrian access or parking on the western side of Broomfield Street from the end of September until this work is completed in mid-2023.

TRAFFIC CHANGES ON BROOMFIELD STREET

There will be changes to the traffic set up in order to carry out this work safely. From the beginning of October 2022, traffic entering Broomfield Street from **Bridge Street** will be able to turn left and right onto Broomfield Street, with one-way traffic in either direction from this intersection. All traffic on Broomfield Street between Bridge Street and Sussex Street will be one-way southbound only during this time.

Access for pedestrians and cyclists will be managed by traffic controllers, signage and barriers on site. Cyclists may be required to dismount and walk in certain areas of Broomfield Street or use alternative routes via Sussex Street and National Street.

JUNCTION STREET CLOSURE

We will be temporarily closing the intersection of Junction Street and Broomfield Street for short periods of up to 48 hours in October to allow our teams to safely install drainage. This closure will take place in stages to reduce the impact to the community. During this time, road users can detour via Broomfield Street, Sussex Street, National Street and Bridge Street. A detour map can be found on the next page.

SUSSEX STREET UNDERPASS

The small section of Sussex Street is scheduled to reopen on 27 September 2022, weather permitting. In the event of heavy rain, this closure may be extended. Please check electronic message signs in the area for the reopening date.

There will be an additional temporary closure of this section of Sussex Street for up to five days in mid-November, to allow the team to set up a crane to safely lift and place large planks on the new Sussex Street rail bridge. Details of this closure will be provided in future notifications.

Please pay close attention to road signage and follow the directions of traffic controllers to ensure everybody's safety. A map showing details of the work locations and traffic changes can be found on the next page.

HOW MIGHT THIS WORK AFFECT YOU?

This work may be noisy and possibly disruptive however every effort will be made to keep noisy works to a minimum and reduce impacts to the community wherever possible. Some of the measures we will implement include noise monitoring and using noise mitigation devices on equipment. Work will take place during standard construction hours: 7am to 6pm Monday to Friday and 8am to 1pm on Saturdays.

To provide feedback about these works, or to let us know your preferences for working times, durations or respite measures, please call our 24-hour Enviroline on 1300 550 402, email cabramattaloop@fultonhogan.com.au or mail PO BOX 6099, Alexandria NSW.
