

THE LOOP

News from the Cabramatta Loop Project December 2022

CLP_22

The new rail bridge at Cabramatta Creek is taking shape.

This issue reflects on the progress over the last year and what you can expect to see in 2023, as we begin to shift focus to work inside the rail corridor. If there's something you want to hear about, please let us know.

THE YEAR IN REVIEW

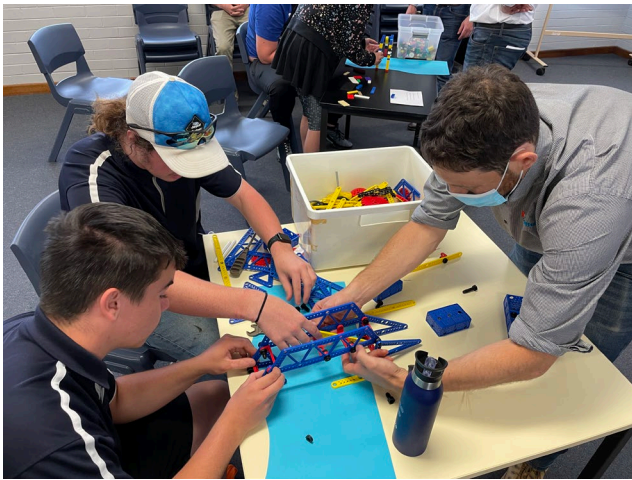

We have come a long way since the beginning of the year when construction of the bridges began. The team has worked tirelessly through adverse weather conditions and has recently landed the first planks on the new rail bridges at Cabramatta Creek and Sussex Street. This work was completed without disruption to the nearby train lines, which is a credit to the team's precise planning and execution of these activities.

A large portion of the works on the eastern side of Broomfield Street including kerb, gutter, parking bays, footpaths and driveways has already been completed. The remainder of this work will be completed later in 2023. Great progress is being made on the western side of the street and construction of the retaining wall and relocation of the noise wall will continue next year.

The work completed during our weekend rail shutdowns during the year has been crucial in ensuring steady progress is made inside the rail corridor. This work has included building new signals and track work, including formation widening. We will continue these activities during standard construction hours and weekend shutdowns in the new year. Details of these works will be made available ahead of the work starting.

SCHOOL PRESENTATION

Our team spent a fun morning at Lawrence Hargrave in Warwick Farm. The session was held at the school with year 10 students who are studying their Vocation Education Training (VET) Construction Certificate II course, as part of their curriculum. Students participated in some challenging engineering activities with guidance from the project staff and learned more about the project during a short presentation. It was a great way to engage with local youth to inspire them to consider a rewarding career in construction.

Students got to learn about construction from team members.

The Year 10 students and members of the Cab Loop team.

TEAM RIDES FOR MS

A few of our fittest team members recently participated in the MS Gong Classic Ride. This is an annual charity event which raises awareness and funds for people living with a neurological condition called multiple sclerosis (MS).

This year 10,000 cyclists took part in the ride, which winds its way from Sydney to Wollongong. Our team took on the 79km course challenge and raised almost \$53,000 for this worthy cause to contribute to the search for a cure.

PROJECT STATISTICS

Some of the main activities we have achieved on the project to date include:

Broomfield Street – Eastern Side

- 545m kerb and gutter installed
- 1628m² parking bay paving
- 296m² driveways poured
- 289m² footpath poured

Broomfield Street – Western Side

- 168 piles for retaining wall
- 330m sewer main installed

Rail Bridges

- 18 piles and 30 planks installed at Cabramatta Creek
- 14 piles and 36 planks installed at Sussex Street

Rail Corridor

- 4 signal locations complete
- 330 metres rail track formation

OUR PROPOSED OUT OF HOURS WORK SCHEDULE

The following table provides indicative information about the works currently planned outside standard construction hours. The timing or type of work may change due to weather or other unforeseen circumstances. Further information about these works will be provided in the project's community notifications at least five days before the works take place. **NOTE: We may need to work up to 8 nights for both works inside the rail corridor, and 8 nights per month for works outside the rail corridor, as well as 2 additional Saturday afternoons per month.**

For more information about our hours of work and how we manage noise, visit our website by scanning the QR code on the next page.

DECEMBER SHUT DOWN

The project team will be taking a break and shutting down the construction site from Friday 23 December and will return to site on Wednesday 4 January 2023. We are wishing everyone a safe and happy holiday season!
