

CABRAMATTA LOOP PROJECT

January 2024

CLP_50

The Cabramatta Loop Project will increase rail freight capacity on the Southern Sydney Freight Line by constructing a new 1.65km section of track, allowing freight trains travelling in either direction to pass each other. Fulton Hogan is designing and constructing the Cabramatta Loop Project for ARTC.

RAIL CORRIDOR WEEKEND WORK

We have limited opportunities throughout the year when we can access the rail corridor. There is a pre-planned railway track closure for the Cabramatta Loop Project from **10pm Friday 2 February to 10am Monday 5 February 2024**.

More information about the works is listed in the table below and maps showing the work locations can be found at the end of this notification.

LOCATION	WORK ACTIVITIES
Rail corridor between Villawood and Glenfield	<ul style="list-style-type: none">• Earth and drainage works• Signalling works (cable pulling, signal post and cabinet installation, signalling connections and updates)
Rail corridor between Warwick Farm and Cabramatta	<ul style="list-style-type: none">• Track work including replacing ballast (the rock layer underneath the tracks), replacing sleepers, installing rail and associated works required to complete the construction of the new loop track• Tamping (compacting the ballast)• Drainage works• Signalling works

PARKING AND TRAFFIC CHANGES

We will **temporarily close** some parking spaces to allow safe set-up of machinery outside the rail corridor:

- **10 car parking spaces at Cabramatta East Station** in Broomfield Street (opposite Cabravale Leisure Centre), and
- **30 car parking spaces at Warwick Farm Station**

Traffic control will be operating a stop-go arrangement at both locations.

EQUIPMENT

Equipment used will include a crane, excavators, vacuum trucks, concrete breakers and hammers, bulldozers and graders, watercarts, vibratory rollers, power hand tools, surveying equipment, construction vehicles, lighting towers, work trucks and a tamping machine.

HOW MIGHT THIS WORK AFFECT YOU?

Some of this work may be noisy and disruptive, however every effort will be made to keep noisy works to a minimum and reduce impacts to the community wherever possible. Some of the measures we will use include turning off equipment when not in use, setting up noise blankets around work sites where possible and using non-tonal ('white noise') reversing alarms on vehicles. Works will be monitored to make sure noise levels are being managed effectively. **You can find out more information about noise and vibration in the fact sheet on our website cabramattaloop.com.au.**

CONTACT US

To provide feedback about these works, working times, durations or respite measures, **please call our 24-hour Enviroline on 1300 550 402, email cabramattaloop@fultonhogan.com.au or mail PO BOX 6099, Alexandria NSW.**
