

# CABRAMATTA LOOP PROJECT

APRIL 2024

CLP\_52

The Cabramatta Loop Project will increase rail freight capacity on the Southern Sydney Freight Line by constructing a new 1.65km section of track, allowing freight trains travelling in either direction to pass each other. Fulton Hogan is designing and constructing the project for ARTC.

## PROPOSED OUT OF HOURS WORK SCHEDULE

This community update contains information about our proposed schedule of works outside standard construction hours, over the next twelve months.

### LOW IMPACT ACTIVITIES BETWEEN GLENFIELD AND VILLAWOOD

Construction of the project is nearing completion. Once completed, the project enters its defect liability period where identified outstanding work items are completed.

This work may involve working on local roads (within the Cabramatta and Warwick Farm area) and/or work within the rail corridor (from Villawood to Glenfield). Works are likely to be low impact compared to normal construction work. If work is likely to cause noise or disruption further information will be distributed to the affected residents and businesses.

We have limited opportunities throughout the year when we can access the rail corridor. There are pre-planned weekend railway track closures for the Cabramatta Loop Project. We may be required to work during the following track closures:

- April 2024 possession – 6am Saturday 20<sup>th</sup> April to 6pm Sunday 21<sup>st</sup> April
- September 2024 possession – 10:30pm Friday 13<sup>th</sup> September to 02:00am Monday 16<sup>th</sup> September
- November 2024 possession - 10:30pm Friday 22<sup>nd</sup> November to 02:00am Monday 25<sup>th</sup> November
- March 2025 possession - 10:30pm Friday 28<sup>th</sup> March to 02:00am Monday 31<sup>st</sup> March

**An additional community notification, with more information about the construction activities, will be provided at least five days before the out of hours work take place.**

The table below provides information about the works currently planned to take place **outside standard construction hours** over the next twelve months. Standard construction hours are **7am to 6pm Monday to Friday, and 8am to 1pm Saturdays**.

For more information about how we manage noise, visit our website by scanning the QR code at the bottom of this notification (go to the Library page and search for 'noise and vibration').

<b>May 2024 to April 2025</b>	<ul style="list-style-type: none"> <li>Maintenance and defect works</li> </ul>	<ul style="list-style-type: none"> <li>Site demobilisation including removing site sheds</li> <li>Maintenance and defect works</li> </ul>	<ul style="list-style-type: none"> <li>Maintenance and defect works</li> <li>Shade structure installation (Liverpool Station)</li> </ul>

## STANDARD CONSTRUCTION HOURS

We will also be working **during standard construction hours** over the next six months. The following table contains an overview of our proposed works.

BROOMFIELD STREET	JACQUIE OSMOND RESERVE	RAIL CORRIDOR WORK – CABRAMATTA TO WARWICK FARM
<ul style="list-style-type: none"> <li>Landscape maintenance</li> <li>Defect works</li> </ul>	<ul style="list-style-type: none"> <li>Landscape maintenance</li> <li>Defect works</li> <li>Site compound demobilisation</li> </ul>	<ul style="list-style-type: none"> <li>Maintenance and defect works</li> <li>Shade structure installation (Liverpool Station)</li> </ul>

## HOW MIGHT THIS WORK AFFECT YOU

Some of this work may be noisy and disruptive, however every effort will be made to keep noisy works to a minimum and reduce impacts to the community wherever possible. Some of the measures we may use include working during standard hours where possible, turning off equipment when not in use, installing noise blankets and using non-tonal (‘white noise’) reversing alarms on vehicles.

When work is required at night, high-noise work will be carried out for a maximum of two consecutive nights per week. Where high-noise work is anticipated for an extended period of time, mitigation measures and treatments will be discussed with residents depending on the expected noise levels at each property. When high-noise work takes place during the day, one hour of respite will be provided for every three hours of high-noise work. Respite periods can be varied if agreed with impacted residents and stakeholders.

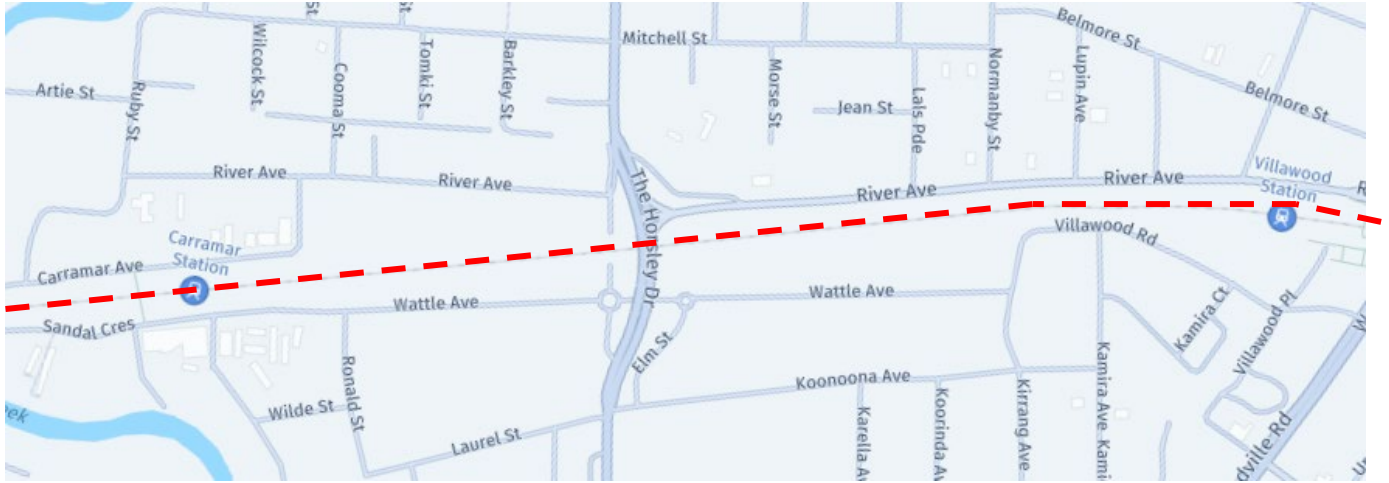

The **Noise and Vibration fact sheet** located on our website [cabramattaloop.com.au](http://cabramattaloop.com.au) identifies construction activities and their associated noise levels in decibels (dBA). It also contains information about how we assess and manage noise and vibration impacts.

## CONTACT US

We would welcome your feedback about these works, working times, durations or respite measures: **please call our 24-hour Enviroline on 1300 550 402, email [enviroline@artc.com.au](mailto:enviroline@artc.com.au) or mail PO BOX 10343, Gouger Street, Adelaide SA 5000.** For information on passenger train impacts, please contact Transport for NSW on 131 500 or visit [transportnsw.info](http://transportnsw.info).
