

## NARRABRI TO TURRAWAN LINE UPGRADE

7 June 2022

### WHAT ARE WE DOING?

The Narrabri to Turrawan Line Upgrade (N2TLU) involves the upgrade of 35km of track between the Hunter Valley Coal Network and Inland Rail.

The project will be delivered from Narrabri Coal Junction at Whitehaven Coal, south of Turrawan, to the future interface with Inland Rail at Narrabri North.

Works include the replacement of existing steel and timber sleepers with heavy duty concrete sleepers, replacement of the existing rail with upgraded rail, and earthworks.

### RAIL DELIVERY

ARTC is delivering rail in the existing rail corridor near Narrabri Junction. The rail is required for a track upgrade work planned for later this year.

Deliveries are proposed on the following days, weather permitting:

- Wednesday 15 June, between 7am and 6pm
- Thursday 16 June, between 7am and 6pm

### HOW COULD THIS WORK AFFECT YOU?

The proposed unloading activities may be noisy, however we will try to reduce the impacts wherever we can. The rail will be delivered by train or trucks and will be unloaded next to the rail track.

Level crossings may also be occupied. Any impact will be for a short duration and temporary.

Equipment used will include:

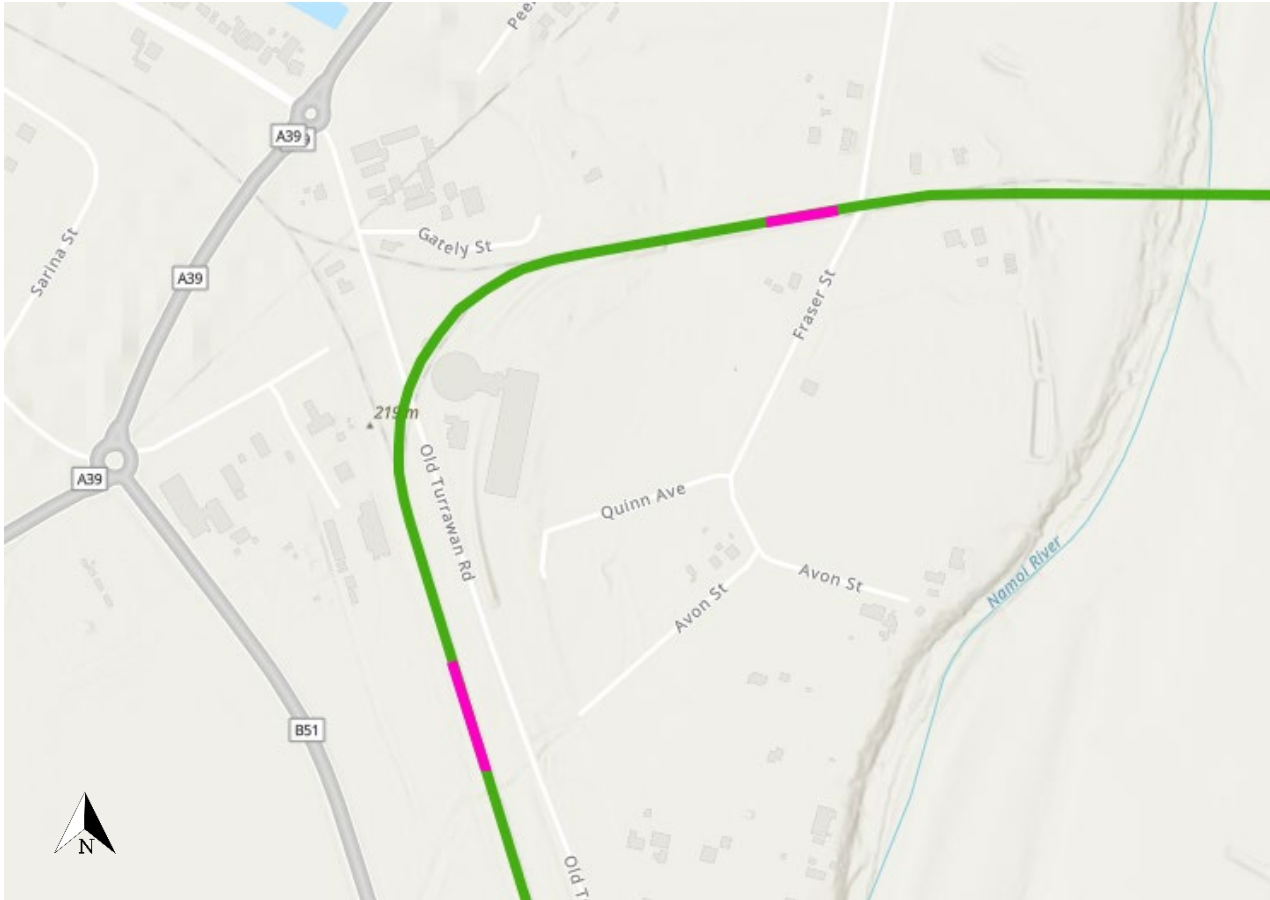

- High rail vehicle
- Front end loader.

All reasonable measures to reduce noise impacts will be implemented, including placing machinery and vehicles as far away from properties as possible.

If you have any questions or concerns during these works, please get in touch by calling Enviroline on 1300 550 402.

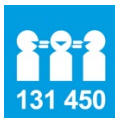

## DELIVERY LOCATIONS
