

NARRABRI TO TURRAWAN LINE UPGRADE

28 March 2023

WHAT ARE WE DOING?

The Narrabri to Turrawan Line Upgrade (N2TLU) involves the upgrade of 35km of track between the Hunter Valley Coal Network and Inland Rail. The project will be delivered from Narrabri Coal Junction, south of Turrawan, to the future interface with Inland Rail at Narrabri North.

Works include the replacement of existing steel and timber sleepers with heavy duty concrete sleepers, replacement of the existing rail with upgraded rail, and earthworks.

RAIL CORRIDOR MIDWEEK TRACK WORK

We have limited opportunities throughout the year when we can safely access the rail track. From **4 to 6 April 2023**, between **6am Tuesday** and **9pm Thursday**, there is a pre-planned railway track closure.

During this period, we will be working on the rail track in Narrabri. Construction activities will include earthworks, replacing ballast (the rock layer underneath the tracks), replacing sleepers, rerailing, and associated works required to complete the upgrade of the rail track. Fraser Street level crossing will also be upgraded. A map showing the location of the work area can be found on the next page.

EQUIPMENT

The equipment to be used will include excavators, dozers and graders, trucks, power hand tools, watercarts, vibratory rollers, semi-trailers, construction vehicles, rail saws, welding equipment, traffic control signage and barriers, earth moving machines, lighting towers and a tamper.

TRAFFIC CHANGES

For safety reasons, the Fraser Street Level Crossing will be temporarily closed. There will be a diversion directly next to the level crossing, shown in the map on page 2. Access to properties on Fraser Street will be maintained at all times.

Traffic control will also be in place at Old Turrawan Road, while work is being conducted in the area. Road users may need to wait for short periods, for safety reasons. Please pay close attention to road signage and follow the directions of traffic controllers.

HOW COULD THIS WORK AFFECT YOU?

This work may be noisy and disruptive, however every effort will be made to keep noisy works to a minimum and reduce impacts to the community wherever possible. Some of the measures we may use include turning off equipment when not in use, setting up noise blankets around work sites and using non-tonal ('white noise') reversing alarms on vehicles.

Due to the frequent wet weather we are experiencing, the date of these works may change. Please contact the Enviroline if you have any questions. We appreciate your continued patience and understanding while we carry out this important work.

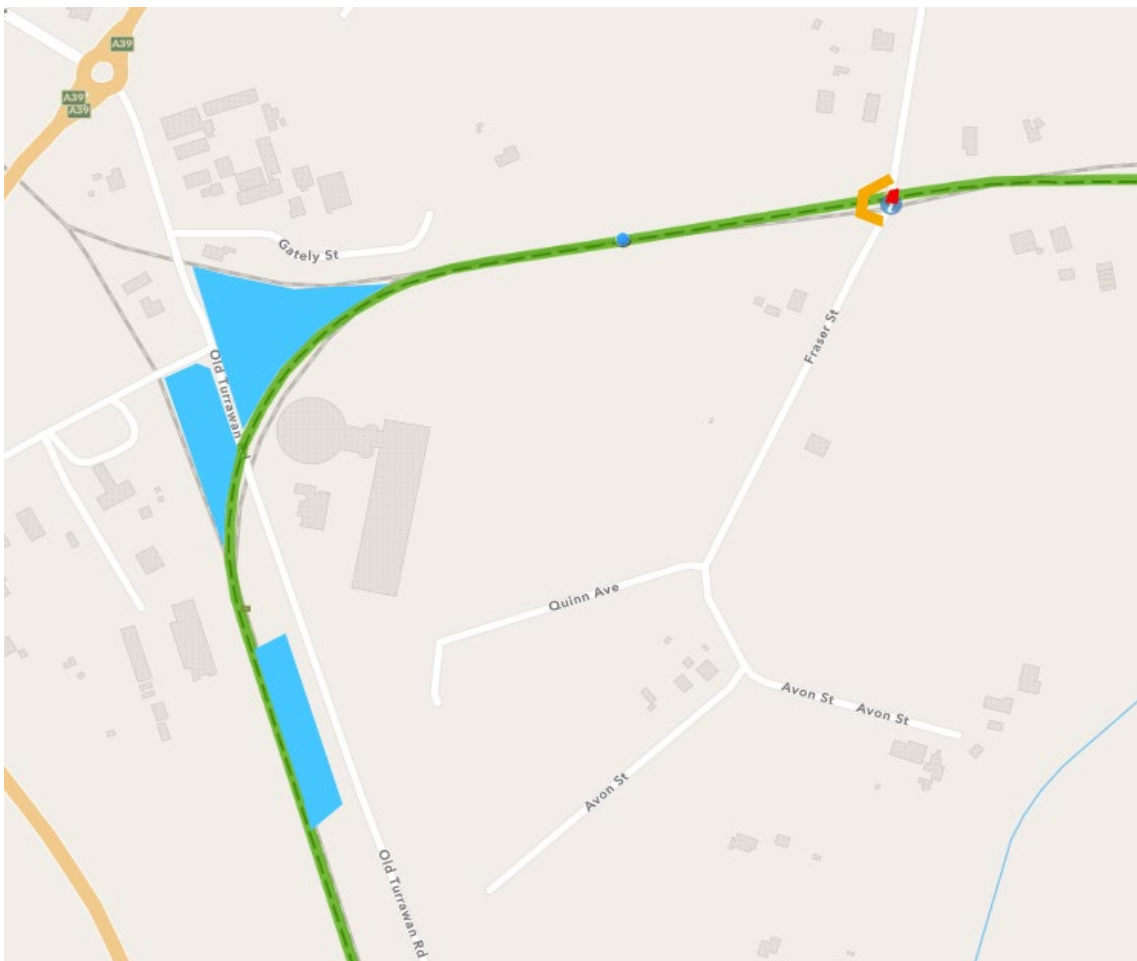

CONTACT US

To provide feedback about these works, working times, durations or respite measures, **please call our 24-hour Enviroline on 1300 550 402 (mention 'Narrabri to Turrawan')** or by emailing nswprojects@artc.com.au.

You can find out more information about the project and upcoming works by visiting our website artc.com.au/n2tupgrade.
